

New water rates will go into effect on July 1, 2012 Pursuant to approved rate schedules, the City's water and wastewater rates will increase effective July 1st

. While the water Capital Improvement Program (CIP) charge will remain unchanged, all other water charges including monthly service charge, fire service charge, and consumption rates will increase. However, unlike previous water rate changes, the increases will be fairly minor; with the average residential monthly service charge increasing by only \$1.22 and the residential consumption charge increasing by only \$0.12 for Tier 1 usage and \$0.13 for Tier 2 usage. This would increase an average residential water bill by \$3.14, based on current conservation efforts and goals.
